

## 2-Hour Field Demonstration Session for Builders, Inspectors & Local Government Staff

MECA is offering a field seminar in Mankato!

**August 25, 2010**  
**Benson Park Cottages**  
**SE of Timm Rd/Rolling Green Ln**  
**Intersection**  
**North Mankato MN 56003**

**Who Should Attend: Engineers and technicians** responsible for designs of temporary and permanent erosion control measures; **contractors and builders** who install and maintain them; and **planners, administrators and inspectors** who review and permit them.

This interactive, fast-paced and hands on field course will provide a better understanding of erosion and sediment control practices and products available, average costs of practices, and the vendors and contractors that provide these products and services.

Examples include hydromulch types 5,6,8, and 9, categories 1-6 blankets, turf reinforcement mats, flexible growth mediums, inlet protection options, compost and shredded wood berms, and much more.

**\$40 MECA Members**  
**\$45 Non-Members**

[Register now](#) by completing the workshop registration form and submitting it to the MECA office by fax (763-478-3612) or mail. The form can be found on the MECA website. Don't miss out on this exciting event!
