

Design, Construction and Maintenance of Permanent Erosion Control Projects

Advancing Effective
Stormwater Management
and Erosion Control Practices

July 29, 2010

Who Should Attend:

Engineers and **Technicians** responsible for designs of permanent erosion control measures; **Contractors** who install and maintain them, **Planners**; **Administrators** and **Inspectors** who review and permit them.

Location:

Hastings Fire Station
115 5th Street West
Hastings, MN 55033

*This one day workshop introduces designers, regulators and contractors to the **latest permanent erosion control practices and techniques**. Examples of successful and unsuccessful erosion control projects will be provided, along with samples of materials and corresponding manufacturers' design and informational literature.*

Weather permitting; a field visit of a few nearby sites will be conducted for participants to further understand the materials and applications. Manufacturers' representatives will be at the workshop to introduce participants to sample designs. The workshop gives participants an opportunity to learn about a range of cost-effective methods and designs.

Agenda

8:00 Introduction

8:15 Design, Construction and Maintenance of Permanent Erosion Control Measures, Steve Klein, Barr Engineering and John Chapman, University of MN Extension

11:00 Field visit of sites to observe TRM, riprap and filter, and possibly cable concrete

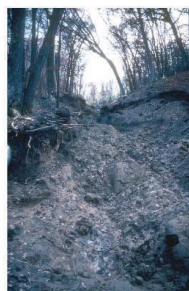

12:00 Lunch

1:00 Group participation to critique problem site photos

1:30 Vendor presentations, products and examples

3:30 Conclusion of workshop
